

Nineteen Hundred Seventy Eight

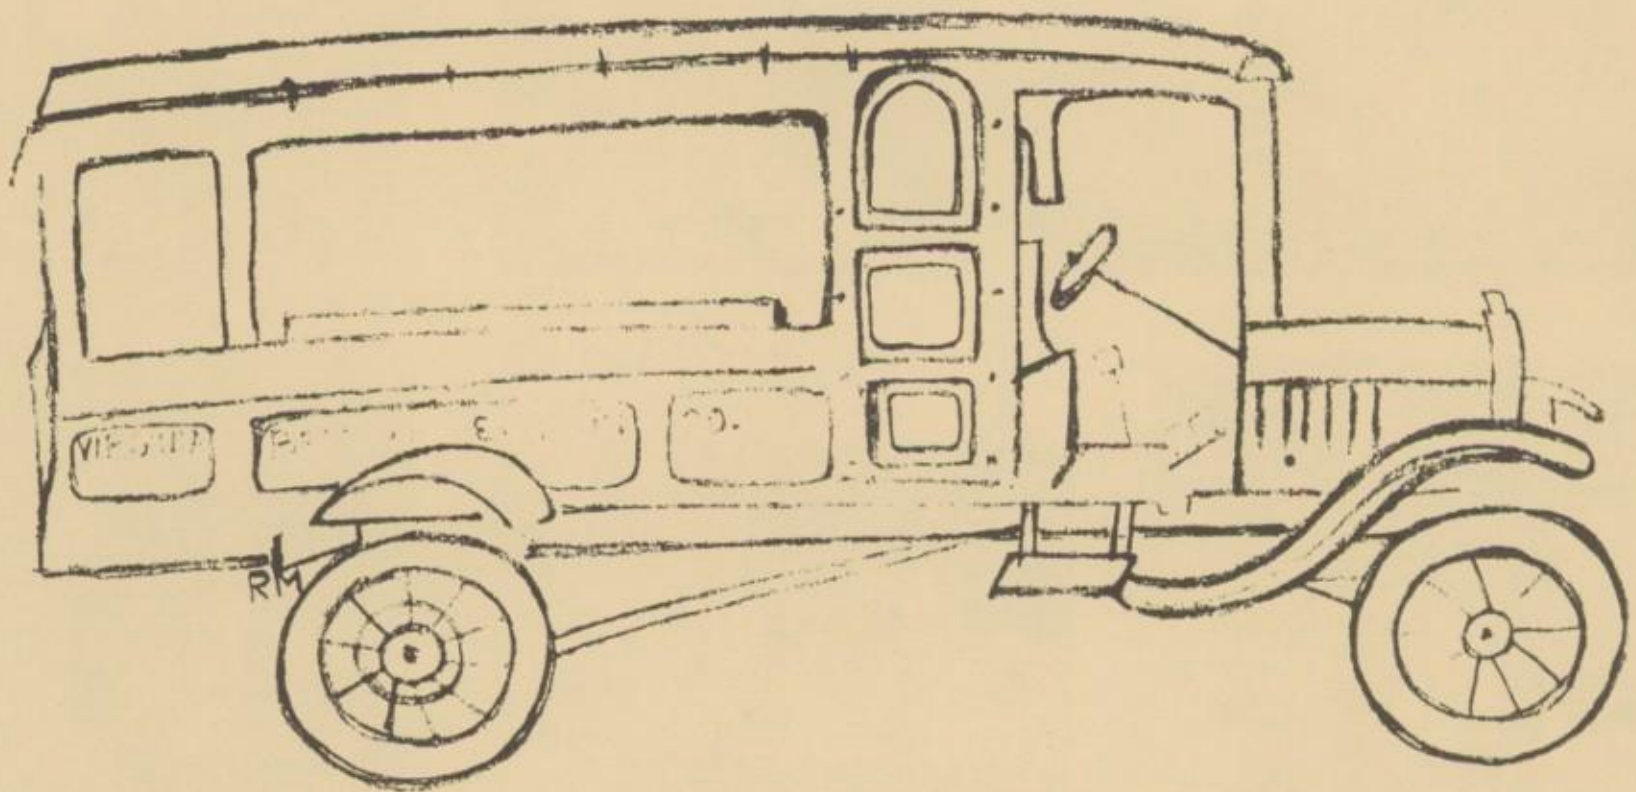

#28

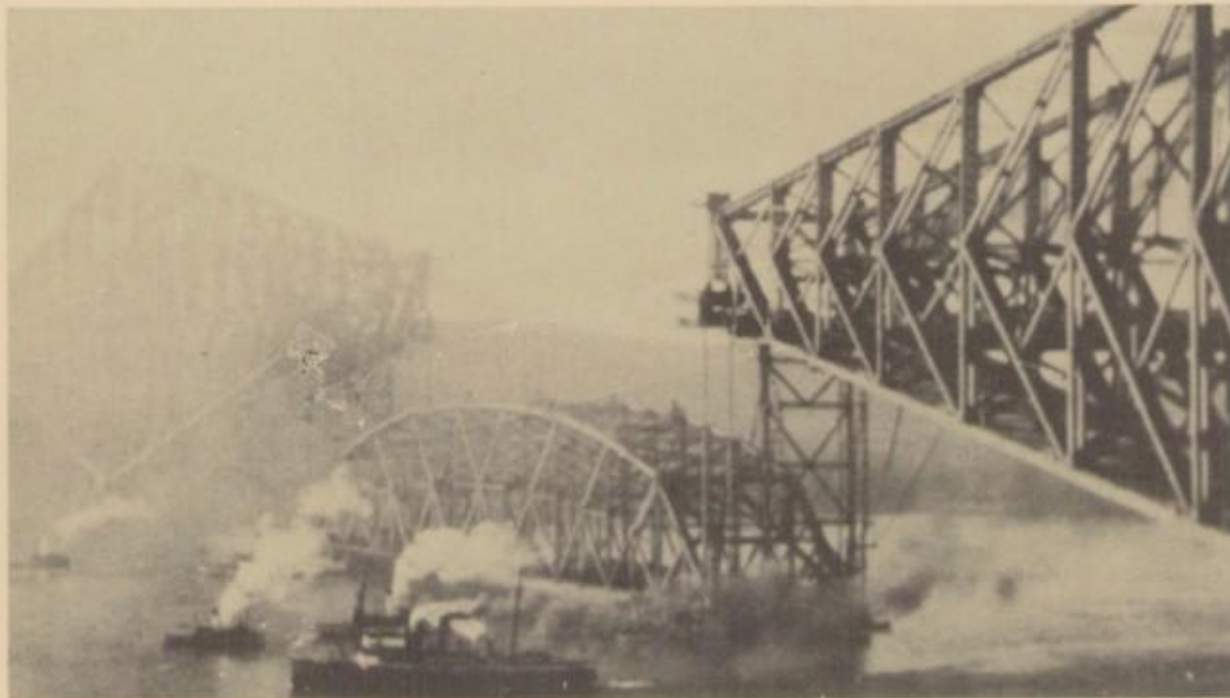

North Cross School
Roanoke, Virginia
Volume XVI
Dave Trinkle, editor

I called the New World into existence to redress the balance of the old.

They are made of things past.

Time devours all things.

We are tomorrow's past.

We Dedicate This 1978 Compass to Mr. and Mrs. John H. Tucker, Jr.

"Fond memories bring the light
of other days around us."

"That best portion of a good
man's life, his little nameless, but
remembered, acts of kindness
and of love."

“Benefits too great to be repaid . . .”

—Thomas Grey

IN surpassing smartness and in brilliancy of performance, the LaSalle is as new as this morning's sun—but in its assurance of fine and unfailing service it is as old as Cadillac's own twenty-five years of reputation and responsibility

The LaSalle is the fortunate beneficiary of those engineering principles and precise practices which Cadillac, during the last fourteen years, has continuously refined and improved in manufacturing 250,000 eight-cylinder, 90-degree, V-type motor cars.

Now 80 stores strong and more on the way — Moore's is one of the southeast's largest and fastest growing chains of building material stores!

We're the place both home builders and home owners depend on for their building and remodeling supplies. Many of our products are especially designed for ease of installation so that unskilled customers who want to save money by doing the job themselves can achieve a professional look in their workmanship without special tools or previous experience. We stock hundreds of "famous name" products — and our volume buying power enables us to sell at the lowest possible prices.

Moore's serves communities in Connecticut, Maryland, Missouri, New Jersey, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia and West Virginia — but "home" is right here in the Star City — Roanoke!

THE CHALLENGE

From the atom to the sun . . . the universe pulsates with energy in many forms.

The challenge is to find ways . . . new ways . . . to utilize the earth's vast storehouse of fuels in providing the energy needed for this nation to continue to be great.

The means — innovative technologies, exotic engineering, dynamic architecture — exciting advances that must come if man is to tap Nature's lode for the energies he needs.

From the smallest part of the universe to the largest . . . that's the scope of the energy field today. The opportunity for personal achievement is infinite; the challenge, one that must be met.
